
Professional portrait photography

Wondering if a CV is better with or without a photo? Don't be afraid to add your photo. Recruiters will appreciate the personal touch.

What should a photo for a CV look like?

- the appropriate photo format is the one you have in your ID card or passport
- it captures your face, and the background is solid
- the photo can be in colour or black and white

It is not easy to take such a photo by yourself.

This is why we are offering the services of a professional photographer.

You will be photographed by great [Jan Rasch](#) and his colleagues.

No registration - just come.
